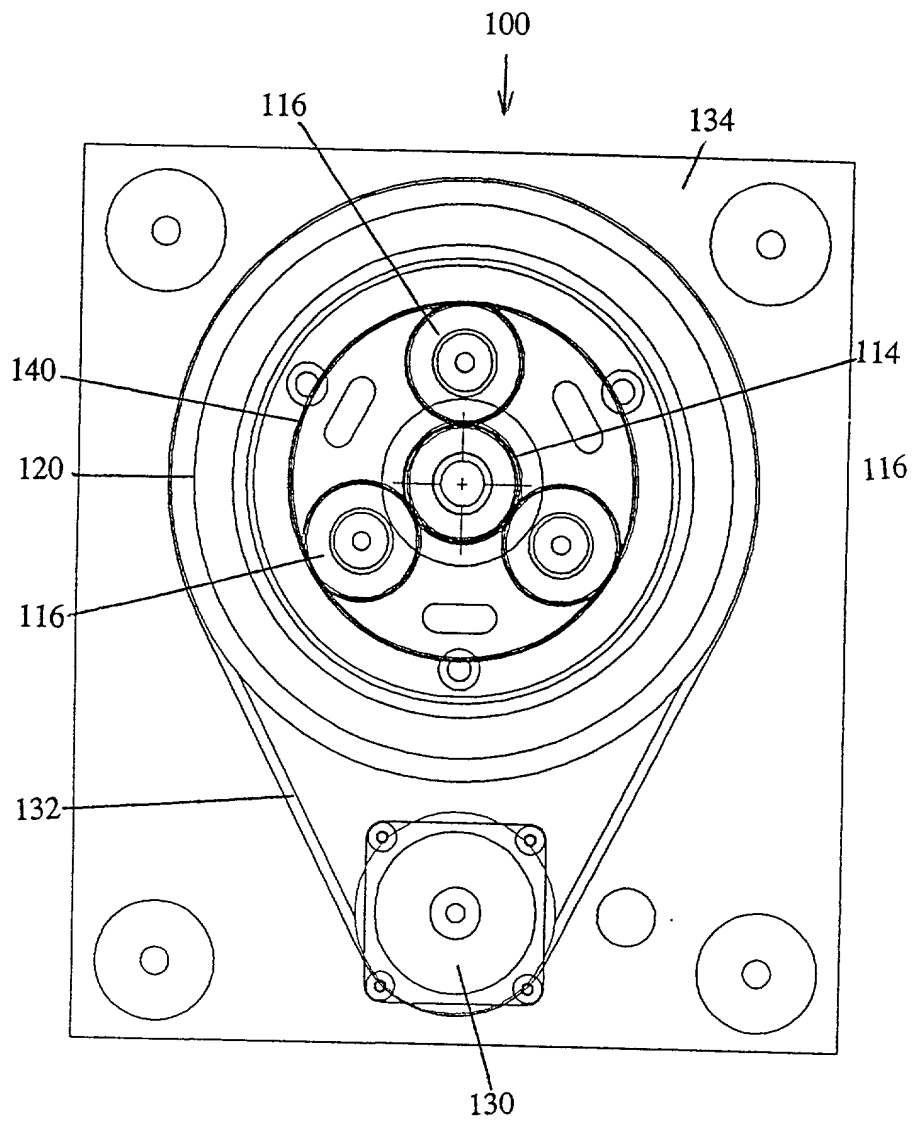

Figure 5

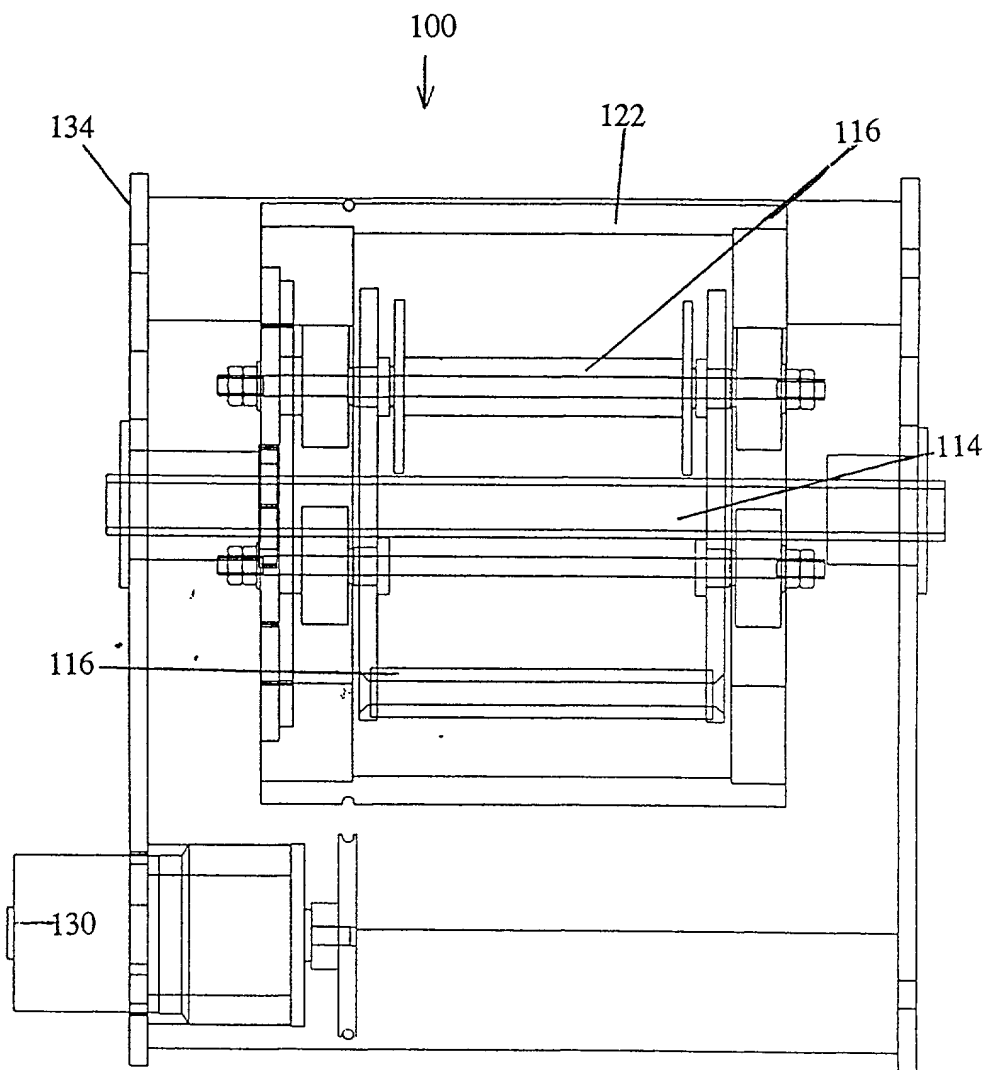

Figure 6

Figure 7 consists of six cross-sectional views of a circular device, arranged in two rows of three. Each view shows a central structure within a circular housing. The views are labeled with reference numerals: 14', 16', 22', 40, 42, 44, 46, and 48. The views show different internal configurations, including a central rod (44), a central rod with a cross (40), a central rod with a cross and a central hole (42), a central rod with a cross and a central hole and a central rod (46), a central rod with a cross and a central hole and a central rod and a central rod (48), and a central rod with a cross and a central hole and a central rod and a central rod and a central rod (40).
